Online Progress Reviews and Candidature Management

Higher Degree Research Management

ResearchMaster's Higher Degree Research product suite allows you to easily manage and monitor all phases of your HDR candidature requirements from initial application, enrolment, ongoing progress, and final outcome.

Use automated online progress reviews and candidature management forms to minimise your administrative overheads and improve both your data quality and service delivery to students.

Scholarships & HDR Students

Capture all applicant and application details, and manage all scholarship recipients and postgraduate students' enrolments, confirmation of candidature, course progress and supervisors details. Allow students to view their real time study load details, and give access for supervisors to oversee their students progress, including leave, enrolment extensions and study mode changes. Capture Thesis details and submission history, as well as examinations.

Online Progress Reviews

Transform your higher degree research student management with fully automated online student progress reviews. Track reviews through all stages of the process, and easily extend due dates as required. Automate email notifications to candidates, supervisors and heads of academic units reminding them of their tasks in the progress review process.

Integrate

Keep data up to date by integrating with your student system, as well as linking your research students to their related research projects, contracts, ethics and research outputs.

Candidature Management Forms

Minimise data entry and errors by pre populating existing information from the postgraduate record into the online forms. Allow students to submit online requests including:

- change of supervisor
- leaves of absence, load changes, extensions and confirmations
- changes to program and candidature upgrades
- notifications of intent to submit thesis
