## Pre & Post Award Management

# Pre & Post Award Management

**ResearchMaster's RME Pre & Post Award** product suite allows you to manage the full research lifecycle as simply as possible. This includes online forms for researchers to submit their project and grant requests, ethics applications, and research output details, as well as comprehensive tracking and management of grants, contracts, intellectual property, ethics, research outputs and personnel.

RME seamlessly links related data across all modules, and integrates with other systems including HR, finance, and publication repositories, allowing you to measure and report on all your research activities across your organisation in one place.

## Projects & Grants

Minimise your researchers' administrative burden by creating easy to use online forms to capture their initial ideas, expressions of interest, and grant application details. They can clone the applications to reuse again and again, only needing to modify the changing details. Create the forms to suit your business requirements and approval process. Capture and report on ongoing funding, budget and financial details.

## Contracts & IP

Record all contract, registration and intellectual property details and link to related projects, personnel and funding bodies. Keep track of sign off events throughout the project and contract lifecycle.

## Research Outputs

Easily report on all your research outputs to meet your institutional needs and government requirements. Use the online forms to capture the details directly, or integrate with other repositories including Symplectic™ Elements. Record collection purpose, FOR and SEO classifications, and link to related grants, projects and personnel.

## Integrate

Keep data up to date by integrating with your other systems including:

- HR
- Student
- Finance
- Research Outputs
- Symplectic™ Elements

## Reporting

Use the built in report designer to create your own detailed reports to track and measure all your research activity. You can also integrate with Crystal Reports and other third party business intelligence tools.
