

ResearchMaster Enterprise (RME)

**The complete research management
system**

Research Management

ResearchMaster's ResearchMaster Enterprise (RME) is a highly automated, fully integrated, research management system which has been designed, developed and supported in Australia.

RME enables you to seamlessly collect, manage and report on the full lifecycle of research activities across your organisation. The latest version of the software is the most comprehensive solution on the market and solves day-to-day operational problems through automation and workflow processes, and assists to solve long-term and strategic issues through its reporting and integration tools.

Pre & Post Award Research

Track the complete lifecycle of all your research activities, including grants, projects, contracts, research outputs, and postgraduate research.

Ethics

Manage your human, animal and biosafety applications, approvals and reviews electronically through online forms that are easily configured to suit your business processes.

Higher Degree Research

Easily manage and monitor all phases of your candidature requirements from initial application, enrolment, ongoing progress, and final outcomes.

eForms

With flexible and configurable eForms and Workflow solutions, reduce the administrative burden, increase data quality, and capture key data directly from the applicant once.

Insights

RME's dashboards and reporting tools make it possible to measure and report on the effectiveness of your research activities, to help you gain deep insights and evaluate activities to drive strategic decisions.

Community

As the leading RMS, we encourage and facilitate an active community of users. Join a thriving and highly collaborative group of research managers to help you improve what you do and how you do it.
